Learn and Remember

1. All the numbers with both negative or positive values are integers
– 4, – 3, – 2, – 1, 0, 1, 2, are example of integers.
2. 1, 2, 3, 4, 5, are positive integers where – 1, – 2, – 3, – 4, – 5 are negative integers.
3. 0 is the integer which is neither positive nor negative.
4. On an integer number line, all numbers to the right of 0 are positive integers and all numbers to the left of 0 are negative.
5. The greater the number, the lesser is its opposite.
6. The sum of an integer and its opposite is zero.
7. The absolute value of an integer is the numerical value of the integer regard less of its sign.
8. To add two positive integers or two negative integers, we add their absolute values and assign the sign of the addends to the sum.
9. To add a positive and a negative integers, we determine the difference of their absolute value and assign the sign of addend having greatest absolute value.
